

# Test Operations and Capabilities

Visteon's test operation facilities operate twenty-four (24) hours per day and contain a full range of environmental, vibration, and durability test equipment primarily aimed at servicing the automotive customer. Visteon's team of experts are comprised of talented scientists, engineers, and technicians - with the educational background and product test experience needed to provide timely, accurate and realistic test results. It's this type of dedication and know-how that makes Visteon a valuable partner for your development and production needs. Contact Visteon to arrange a tour or to discuss the details of your specific test program.

Test technologies offered at Visteon's North American facilities include:

- Acoustics and NVH
- Environmental
- Electrical, Electronics, EMC
- Thermal Analysis
- Vehicle Dynamics
- Dynamic Simulation
- Illumination and Optics
- Common Load Box
- NVH Tools and Analysis
- Aerodynamics
