HVCC Showcases Smart Thermal Management Solutions at 2015 Seoul Motor Show

**HV iCOOL™, a space-saving thermal management vehicle solution, makes its public debut**

SEOUL, Korea, April 2, 2015 – Leading automotive thermal management solutions provider Halla Visteon Climate Control Corp. (KS: 018880) is showcasing an array of eco-friendly and highly-efficient technologies for vehicles at the 2015 Seoul Motor Show.

HVCC, which expanded its global reach and product portfolio following the integration of Visteon’s climate operations in 2013, and acquisition of the automotive thermal and emissions product line of Cooper-Standard Automotive in 2014, will showcase its expanded product line at the show.

Highlighting a theme for this year’s show, “Experience HVCC, Smart Thermal Solutions beyond Climate Control,” HVCC will debut a technology demonstration vehicle that allows visitors to experience firsthand the future of smart thermal solutions.

New products for eco-friendly vehicles also are on display at the show, including a heat pump system for electric vehicles, centrifugal air compressor for hydrogen fuel cell electric vehicles, CO₂ sensor and other smart solutions that deliver occupant comfort.

Presented publicly for the first time is HVCC’s HV iCOOL™ solution, a revolutionary integrated climate control system that combines the heating, ventilation and air conditioning (HVAC), compressor and condenser into a single unit with a compact refrigerant system. By design, HV iCOOL enables automakers to rethink the interior design of the vehicle by moving the HVAC from its traditional location behind the instrument panel to locations such as under the driver's seat or in the luggage compartment. By eliminating the electric heater, this patented product is designed to offer up to a 30 percent weight reduction compared with conventional systems and the potential to improve the drive range of an electric vehicle by up to 30 percent.

The 2015 Seoul Motor Show runs through April 12. HVCC’s booth is located at P41 in the Kintex Korea International Exhibition Center.

**About Halla Visteon Climate Control**
Halla Visteon Climate Control (HVCC) is a full-line supplier of automotive thermal management solutions. Products include heating ventilation and air conditioning; compressors; powertrain cooling; fluid transport; and electric, hybrid and fuel cell vehicle thermal systems. With 37 manufacturing sites supported by four global technical centers in 19 countries, HVCC employs more than 15,500 people.

HVCC is a 70 percent-owned subsidiary of Visteon Corporation (NYSE: VC) and is traded on the Korea Stock Exchange. Learn more at [www.hvccglobal.com](http://www.hvccglobal.com).
About Visteon
Visteon is a global company that designs, engineers and manufactures innovative products for nearly every vehicle manufacturer worldwide. Visteon currently delivers value for its customers and shareholders through two technology-focused businesses: vehicle cockpit electronics and thermal management. Visteon owns 70 percent of Halla Visteon Climate Control Corp., the world's second largest provider of vehicle thermal management solutions. With corporate offices in Van Buren Township, Mich. (U.S.); Shanghai, China; and Chelmsford, UK; Visteon has approximately 25,500 employees at facilities in 26 countries. Visteon had sales of $7.51 billion in 2014. Learn more at www.visteon.com.
