

FortiClient Install Instructions for Windows

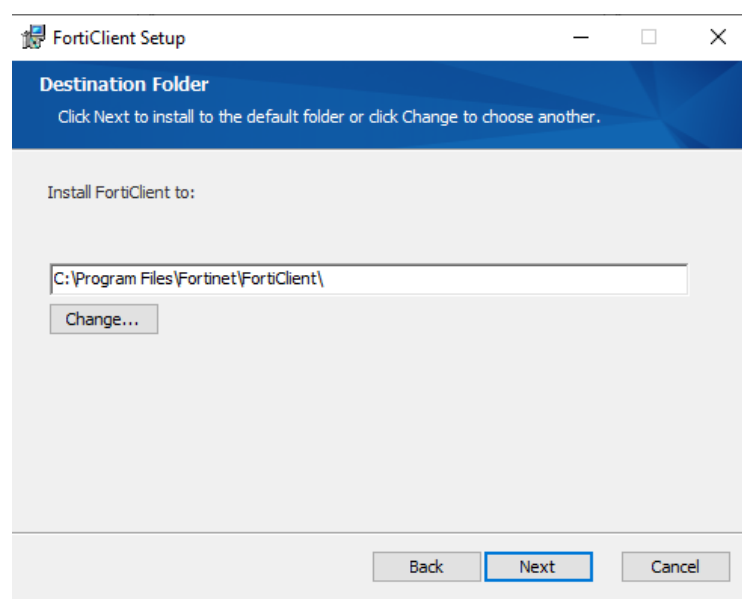

For Windows Operating System

Note: These instructions are for Visteon partners. Visteon employees should already have FortiClient installed on their company computers.

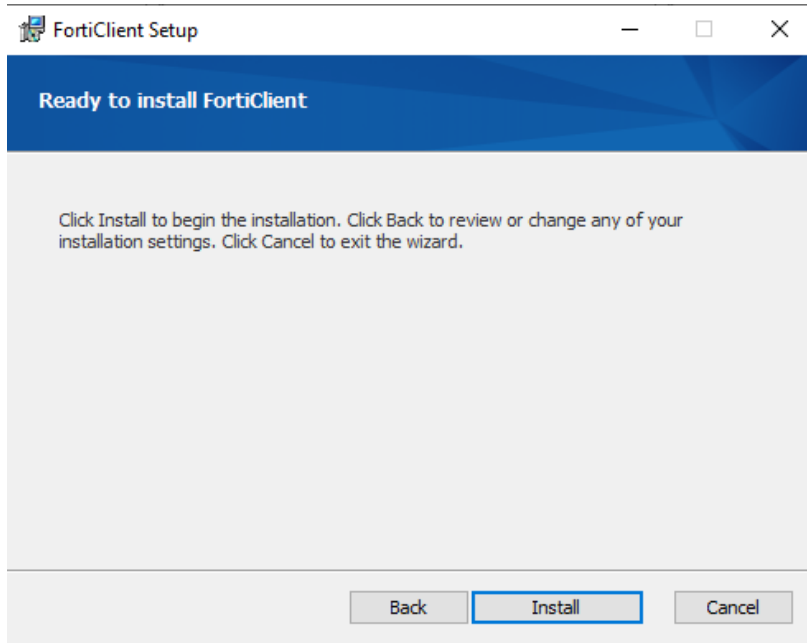

1. Download FortiClient (<https://www.visteon.com/company/suppliers/remote-access-to-visteon/>)
2. Double click the downloaded file.
3. check the License agreement and click next

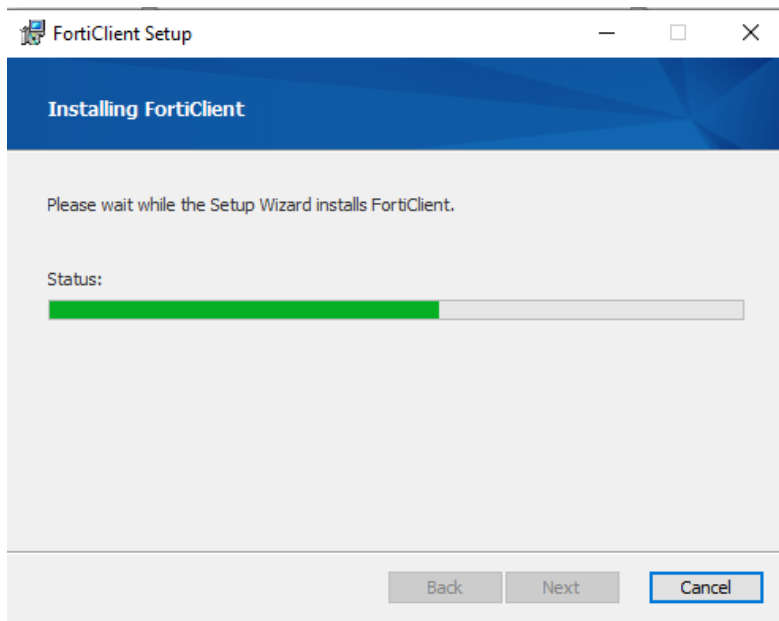

4. Edit destination folder is not required, just click next

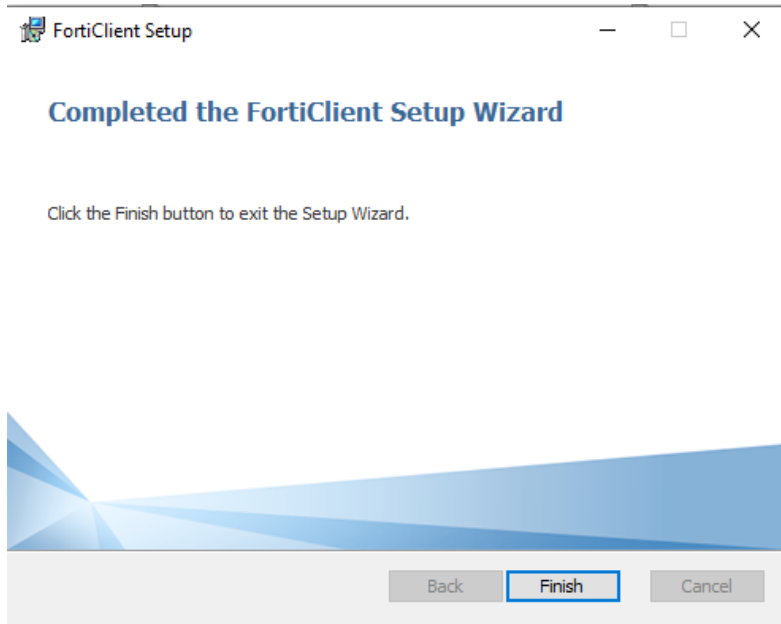

5. Click "Install".

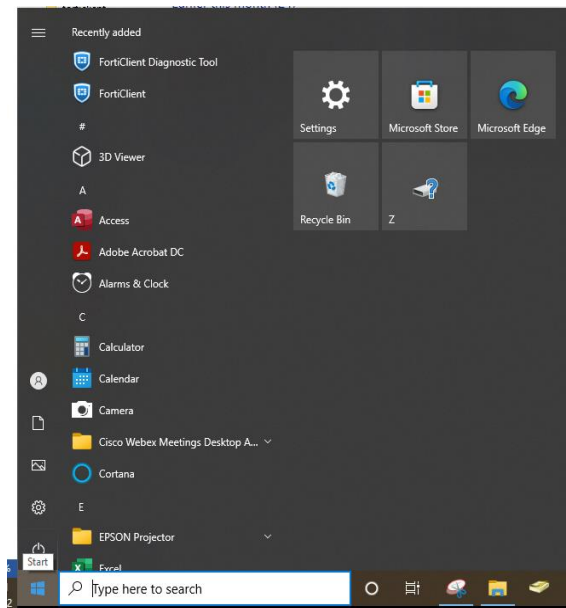

6. Installation begins:

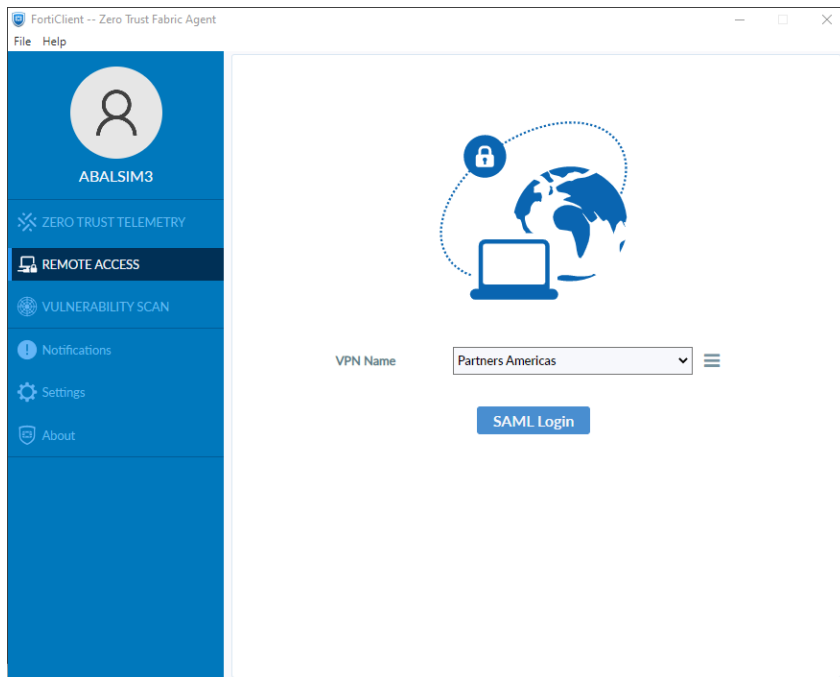

7. Click “Finish” to complete installation.

8. FortiClient is now installed on your PC:

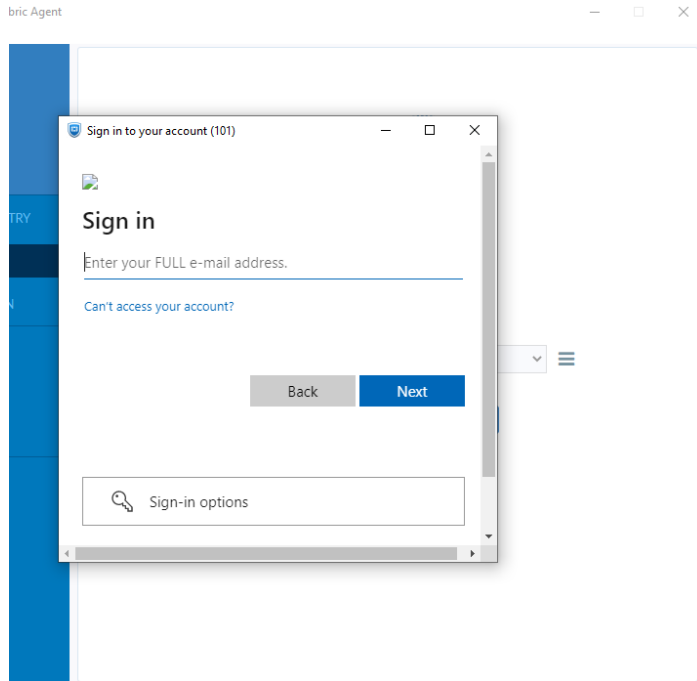

9. Start FortiClient app and pick a VPN Name and use your Visteon CDSID and password to get connected:

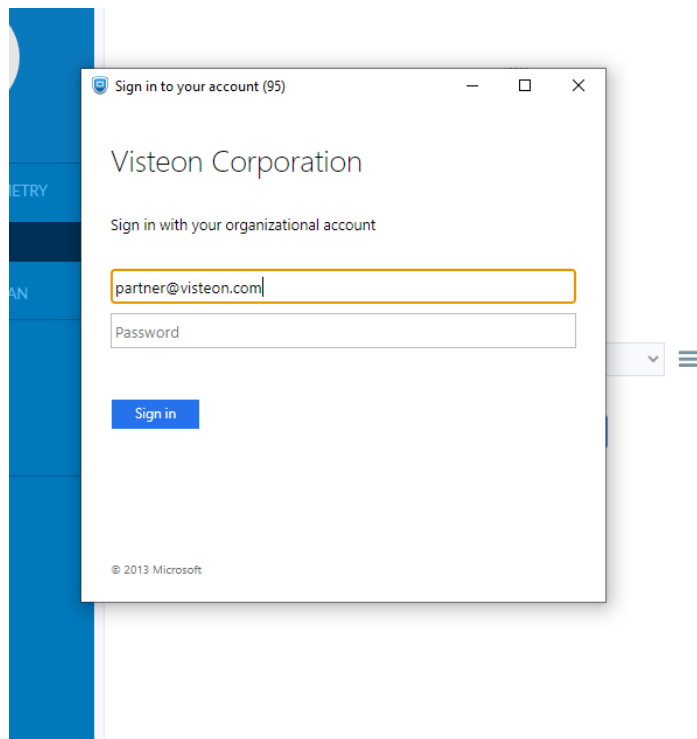

Partners can use one of the following VPN Name based on their location:

- Partners Americas
- Partners Asia Pacific
- Partners China
- Partners Europe

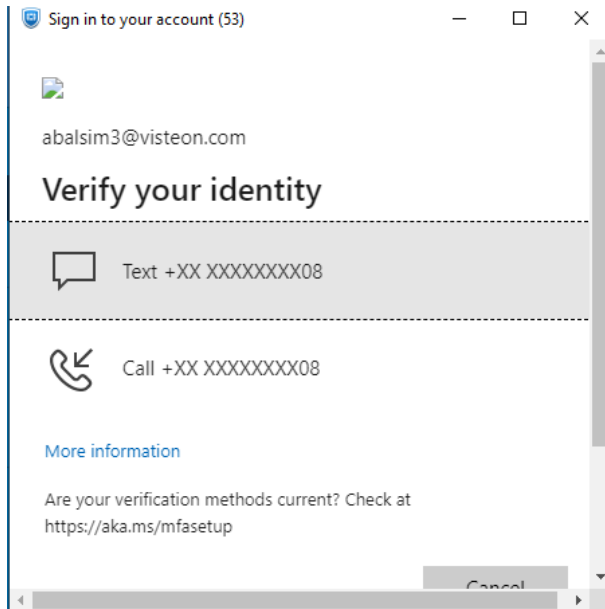

10. sign in with your full e-mail address

11. Enter your password

12. Verify your identity

13. Remote access is now granted
